

**Ibrahimpattam, Ranga Reddy District, Hyderabad - 501 506.**

**Institution's Innovation Council (IIC) 6.0**

## **IIC Activity 2023 - 2024**

Academic Year	: 2023-2024
Quarter	: 3
Program driven by	: EEE Department
Program Name	: <b>A Workshop on prototype /process design &amp; development</b>
Program Thrust Area	: Validation and Concept Development
Program Type	: Interactive Session
Start Date	: 28-03-2024
End Date	: 28-03-2024
Number of Student Participants	: 109
Number of Faculty Participants	: 10
Number of External Participants	: 14
Expenditure Amount, If any	: Rs. 8,500/-
Mode of Session delivery	: Offline

## **Overview**

### **Objectives of this session**

Developing effective problem-solving skills is crucial for academic and professional success. The key objectives of teaching problem-solving approaches to students are:

1. Foster creativity through brainstorming, mind mapping, and lateral thinking.
2. Encourage exploration of multiple solutions and thinking outside the box.
3. Develop critical thinking and analytical skills to evaluate potential solutions.
4. Teach improvisation techniques to adapt to changing situations and generate ideas quickly.
5. Introduce mind mapping as a tool to capture thinking processes and organize knowledge.
6. Promote lateral thinking to change approaches and generate new ideas without logical limitations

## Benefits in terms of Learning/Knowledge obtained

- **Introducing Key Elements of Critical Thinking:** Focus on essential components like reasoning, analysis, evaluation, and inference to cultivate a structured approach to problem-solving.
- **Equipping Participants with Problem-Solving Techniques:** Teach participants how to break down complex issues into manageable steps, identify root causes, and develop systematic strategies for effective solutions.
- **Encouraging Out-of-the-Box Thinking:** Stimulate creativity by challenging assumptions, exploring alternative viewpoints, and considering unconventional approaches to tackle problems.
- **Applying Skills to Real-World Scenarios:** Offer hands-on opportunities through case studies or scenarios, enabling participants to practice and hone their creativity and problem-solving abilities.
- **Emphasizing Fundamental Problem-Solving Elements:** Reinforce the importance of mastering core elements like problem identification, goal setting, information gathering, idea generation, and evaluating solutions to ensure effective outcomes.

**Name of the activity: A Workshop on Prototype /process design & development**

**Speaker: Dr. S.Karunanidhi**

Outstanding scientist and former Associate Director at the Research Centre Imarat (RCI), DRDO, Hyderabad.

**Platform: Offline**

**Date: 28-03-2024**

### **Overall report of the activity**

As part of the IIC's internal activities, an interactive session on **problem-solving** was held on **28th March 2024**, attracting around **120 students** and **10 faculty members**. The session was led by **Dr. Karunanidhi**, a distinguished scientist formerly associated with the **Research Centre Imarat (RCI), DRDO, Hyderabad**.

The focus was on cultivating problem-solving skills, with participants actively engaging in idea-sharing and analyzing various problem statements through dynamic brainstorming sessions. The discussions covered key aspects such as factors influencing **product development**, ensuring **reliability**, and exploring **future innovations**.

Attendees left with valuable insights into critical problem-solving techniques and their practical applications, particularly for electrical engineers. The session highlighted the importance of transforming innovative ideas into **customer-centric solutions**, making it a highly enriching experience for all involved.
